## PROFESSIONAL PROFILE

---

Data analyst with a career in public-sector audit, finance and analytics. Holds an Accounting Science Honours degree and has led external audits of national departments and large public entities, supported audit teams with data analytics and CAATs as Data Analytics Lead, and now delivers end-to-end analytics solutions for a family-owned business. Combines audit-grade rigour in data validation and controls with hands-on Python, SQL, Power BI and Tableau delivery, structured around CRISP-DM. Brings a track record of leading teams, communicating findings to executive management and turning complex data into decisions.

## CORE SKILLS AND TOOLS

---

**Data analytics:** data extraction, cleaning and transformation · KPI definition · analytical modelling · anomaly detection · full-population testing

**Programming and databases:** Python · SQL · Streamlit · hosted databases

**BI and visualisation:** Power BI · Tableau · Excel

**Audit and assurance:** ISA · risk assessment · internal controls · compliance and performance audit · CAATs · ACL Analytics · statistical sampling

**Finance and tax:** IFRS · SA GAAP · GRAP · budgeting and forecasting · variance analysis · VAT, PAYE and income tax

**Systems and methods:** SAP data extraction · CRISP-DM · process automation · AI-assisted development

**Leadership:** team supervision (up to five staff) · stakeholder reporting · coaching and knowledge transfer

## PROFESSIONAL EXPERIENCE

---

### Data Analyst

2022 – Present

*Analytics projects for a family-owned business · Remote*

Analytics, financial analysis and automation for a family-owned business, structured around CRISP-DM.

- Design and deliver end-to-end analytics solutions, from data extraction and transformation to modelling, reporting and visualisation.
- Extract, clean and transform operational and financial data with Python and SQL to create reliable datasets for analysis.
- Define KPIs and metric logic, and build interactive Power BI and Tableau dashboards that let users explore and filter results.
- Built a Streamlit application that captures user-entered operational data, combines it with transformed GPS data and writes to a remotely accessible hosted database.
- Automate manual accounting and operational processes through structured data pipelines and repeatable analytical solutions.
- Use AI-assisted development tools to accelerate delivery, validating every output to ensure reliability.
- Domains: agricultural performance analytics, financial performance and management reporting, driver-hours reconciliation, operational KPI monitoring.

### Data Analytics Lead

2019 – 2021

*Auditor-General South Africa · Pretoria, South Africa · concurrent with Assistant Audit Manager role*

Took on data analytics and CAATs leadership alongside the Assistant Audit Manager role, under an initiative to decentralise specialist analytics capability.

- Extracted financial, operational and payroll data directly from SAP and other public-sector systems using ACL Analytics, reducing reliance on entity-produced extracts and strengthening the integrity of audit populations.
- Validated completeness and accuracy before testing through interface reconciliations, gap testing of sequential records and duplicate testing.

- Designed and ran CAATs across financial, compliance and performance audits, including exception reporting, reconciliations, anomaly detection and full-population testing.
- Developed reusable ACL scripts and automated routines, improving the consistency and efficiency of recurring audit procedures.
- Coached audit staff in data-driven procedures and handed over scripts and documentation, sustaining analytics continuity as teams rotated.
- Identified manual, time-intensive tasks across audit teams and proposed further opportunities to apply CAATs.

### **Assistant Audit Manager**

**2010 – 2021**

*Auditor-General South Africa · Pretoria, South Africa*

Led external audits of national government departments and large public entities in the finance, transport and international relations sectors, in accordance with International Standards on Auditing.

- Led audit teams of up to five on integrated audits covering financial, compliance and performance objectives, managing audit streams within larger engagements.
- Developed the overall audit strategy, allocated staff and structured fee budgets during planning.
- Led compliance audits of supply chain, expenditure and human resource management, governance and general IT controls, and performance audits of reported information against established criteria.
- Applied CAATs to large datasets to identify anomalies and support substantive procedures.
- Drafted management and final audit reports, communicating control deficiencies, root causes and recommendations to executive management and audit committees. Outcomes were tabled in Parliament.
- Founded and chaired the Assistant Managers Forum, creating a platform for coordination and consistent application of audit methodology.
- Collaborated with investigations, performance audit and information systems audit specialists on complex matters.

### **Audit Supervisor**

**2006 – 2009**

*Gobodo Incorporated · Bloemfontein, South Africa*

Conducted external audits of local and provincial government, including a metropolitan municipality of over 1 million residents and its electricity distribution and billing entity.

- Assessed risk of material misstatement, set materiality and determined the nature, timing and extent of audit procedures.
- Walked through significant processes and tested key controls to decide whether reliance could be placed on them.
- Performed substantive analytical procedures and tests of details, and applied statistical sampling with extrapolation of errors across large populations.
- Addressed fraud and management override risk by testing high-risk journals, unusual transactions and accounting estimates.
- Drafted management letters and assisted in forming audit reports under GRAP, GAMAP and the modified cash basis of accounting.
- Supervised teams of up to five auditors and acted as primary contact for client management against statutory deadlines.

### **Trainee Accountant**

**2003 – 2006**

*PKF Accountants and Business Advisers · Bloemfontein, South Africa*

End-to-end accounting and tax services for a portfolio of about 40 small, owner-managed clients across industries.

- Ran the full accounting cycle, from source documents to the general ledger, sub-ledgers and fixed asset register.
- Performed cashbook, payables and receivables reconciliations and posted month- and year-end adjustments including provisions, accruals, prepayments and depreciation.
- Prepared management reports and annual financial statements under IFRS and SA GAAP, with supporting schedules and working papers for audit.
- Built annual budgets and cash flow forecasts, and performed variance and ratio analysis to give clients practical recommendations.
- Filed statutory returns (VAT, PAYE, UIF, SDL, Return of Earnings) and prepared income tax computations for individuals and companies.

- Supervised and reviewed the work of three junior trainees in the final year of training.

## SELECTED ANALYTICS PROJECTS

---

**Driver-hours analysis and time reconciliation:** a Streamlit application captures operational data for a small transport operation, joins it with transformed GPS data and writes to a hosted database accessible remotely. Python, SQL, Streamlit. Made analytical information accessible to the business and cut weekly manual data capture from about 2–3 hours to under an hour.

**Agricultural operations and performance analytics:** analysis of operations and performance for small agricultural businesses. Built with Excel and Power BI, including maps of yield per field, giving the business its first analytical view of field performance.

**Financial performance and management reporting:** performance analysis with defined KPIs and interactive dashboards for small, owner-managed businesses. Built in Power BI where no reporting tools existed before, giving management a first structured view of financial performance.

## EDUCATION AND CERTIFICATIONS

---

**2024:** Certificate in Data Analytics · CareerFoundry, Berlin, Germany

**2002:** Honours Baccalaureus Computationis · University of South Africa, Pretoria

**2001:** Baccalaureus Computationis · University of the Free State, Bloemfontein

**2016:** ACL Analytics (in-house training) · Auditor-General South Africa

**Annually:** updates on international accounting and auditing standards · in-house at PKF, Gobodo and AGSA
